

**DOCUMENT RULES DATA STRUCTURE AND
METHOD OF DOCUMENT PUBLICATION THEREFROM**

ABSTRACT

A data structure and method of automatically creating a plurality of
5 individually customized documents, each for a corresponding one of a plurality of
individuals. Document components are created and stored. Document, condition
and action rules governing document assembly are created and stored. Document
specific data and text specific to individuals is provided with a document request that
initiates assembly of a document. Each requested document is assembled
10 automatically in response to the rules and provided data and text.
